

**Knox Soil & Water Conservation District,
1025 Harcourt Road, Mt. Vernon (740)393-6724
"Serving Our Community and Touching the Earth"
2010 Wildlife Packet Order Form**

The Knox Soil and Water Conservation District conducts a Wildlife Packet program each year that is designed to meet a specific need by landowners to acquire small numbers of tree and shrub stock. This stock is suitable for use in backyards, odd corners, steep banks, or for the development of wildlife land. Transplanting is not necessary and with reasonable care, a fine planting can be developed. All stock is state and federally inspected. It may be necessary for us to make reasonable substitutions based on availability of certain species. However, we guarantee that only first quality plants will be used.

The deadline for ordering your packets is April 6, 2010 or until our supply is exhausted. There is no limit to the number of packets you order. However, payment must be included with your order and orders will be processed on a first come basis. In April, you will receive notice as to when the packets may be picked up at the *Knox SWCD office at 1025 Harcourt Road*. We cannot deliver or mail packets. Purchasers must pick up their orders as we cannot be responsible for packets not picked up, therefore please pick up your order promptly when notified.

Planting instructions, as well as a guide to plant identification, will accompany your packet at the time of pickup. Payment can be made through a money order, personal check or cash. We do not accept credit cards at this time. Payment is expected with the order. Remember that these plants are seedlings, the packet will be about the size of a small bag of groceries. You will be notified of the pickup time with a postcard. Pick up time should be about the third week of April. The District will not be responsible for condition of seedlings if not picked up promptly. If you do not receive a postcard during the second week of April please contact the Knox SWCD at 393-6724 for pickup times.

**It's Tree Packet Time! Hurry and Place Your Order!!!
Deadline April 6, 2010**

Evergreen Packet (20 seedlings/5 varieties) \$15/packet

- ◆ **-Concolor Fir:** Is somewhat similar to the Colorado Blue Spruce. They are fast growing and can grow as high as 150 feet and live over 300 years. They are widely used as ornamental trees. They have softer needles about an 1" long and produce a pleasant aroma. Cones are about 4" long and point up instead of down as with other evergreens. They are somewhat shade tolerant and grow on both moist loamy soils and drier sandy soils.
- ◆ **-Douglas-Fir:** Grows 40' to 60" in height. It has short flat needles and makes an excellent ornamental. Grows in moist locations near streams. Seeds are eaten by several birds.
- ◆ **-Fraser Fir:** This is a classy tall fir tree that has short dark-green needles with silver undersides. It is among the most classy of the conifers. A great ornamental and Christmas tree because of its density and compactness. Fraser Firs will grow in most locations but must have good drainage. Fraser Fir is a medium-sized tree, 40 to 70 feet high and one to more than two feet in diameter.
- ◆ **-Norway Spruce:** A medium to rapid growing evergreen of conical form. The needles are usually four sided, stiff and sharp to the touch. Good drainage is necessary.
- ◆ **-Scotch Pine:** Makes an excellent Christmas tree. Needles are from 1½ to 3 inches long and stiff and are always two in a cluster. They grow in acid soils in somewhat poorly drained to well drained. Grows in a pyramidal shape when young and irregular shape when older. A very rugged conifer.

Nut Tree Packet (8 seedlings/2 varieties) \$10/packet

- ◆ **-American Hazelnut:** Grows 8 to 10 feet in height. Well aerated and light soils such as loamy sands, sandy loams, and loams support vigorous growth. Flowers in March and April; the fruit ripens from July to September. This uniquely flavored nut is eagerly sought by many wildlife species.
- ◆ **-Chinese Chestnut:** A prolific bearer of delicious nuts, similar to the American Chestnut, but is blight resistant. It is not as large a tree as the American Chestnut. Where it has plenty of room to grow, it will have somewhat the shape of an apple tree. The chestnut, like the oaks, holds its leaves during the fall and winter.

Butterfly Bush Packet (7 seedlings) \$10/packet

Vigorous growing, deciduous shrub producing long spikes of pink, purple or white flowers. Full sun. Grows 6 to 8 feet. Attracts birds and butterflies.

Eastern White Pine Packet (25 seedlings) \$15/packet

These 3 year old seedlings are large conifers with needles 5 to a cluster and 2 to 5 inches long. This is an excellent shade and ornamental tree. Our best pine for lumber. Has a rapid growth rate. This packet contains 25 seedlings.

Norway Spruce Packet (25 seedlings) \$15/packet

A medium to rapid growing evergreen of conical form. Cones are pendant and the needles usually have four sides. Stiff and sharp to the touch. Good drainage is necessary.

American Arborvitae Packet (10 seedlings) \$15/packet

A rapid-growing pyramidal shaped conifer. Leaves are frond-like on flat branches and vary from dark to light green during the growing season. The American Arborvitae grows best in poorly to well drained soils and is widely used for windbreaks and screens. Space 4-6 feet apart.

Colorado Blue Spruce Packet (10 seedlings) \$15.00/packet

Grows to be a beautiful tree. Fine for ornamental and Christmas trees. Has short needles typical of spruces. Green to deep blue in color.

Ornamental Packet (20 seedlings/5 varieties) \$20/packet

- ◆ **-American Cranberry Viburnum:** An upright, tall shrub that grows 8 to 12 feet in height. Has showy flat clusters in whitish flowers; glossy scarlet fruit cluster. Blooms in May. Likes deep, moist to well drained soil; sun to light shade.
- ◆ **-Pink Lady Winterberry:** a widely adaptable small tree. Tolerates poor soils and drought conditions and is easy to transplant and is quite insect and

disease free. It is a moderate growing round to oval headed small tree. Grows 15-20' tall with a 10-12' spread. It tolerates a wide range of growing conditions—particularly well-adapted to dry soils. Appears to tolerate most soils and exposures. Sometimes used for windbreaks and screens. Grows with vigor under good moist conditions. In dry land areas responds to mulching. Flowers are yellowish, non showy and 3 to 7 per cluster. The fruit is a four lobed capsule, about 1/4 to 1/2" across. When opening in the fall, the capsule exposes the bright-red coating of the seed. Just prior to ripening, the seed capsules have an attractive pinkish cast. It is a prolific fruit producer and the fruits remain after the leaves drop, creating quite a show in the fall.

- ◆ **-Sawtooth Oak:** Grows 35 to 40 feet in height. Pyramidal to broad in shape. Grows on acid soils, in full sun and is heat tolerant. Has small acorns, good for wildlife.
- ◆ **-Serviceberry:** Grows to 30 feet in height. Flowers are a snowy white. Blooms early in the spring, before foliage appears. Provides edible fruit similar to blueberries. Orange-red fall color.
- ◆ **-White Flowering Dogwood:** This is a small tree growing to approximately 25 feet in height. It is one of the finest ornamental trees in the Eastern United States. It grows slowly; is long lived and will live in either sun or shade, on a dry or well drained soil.

Hardwood Packet (18 seedlings/3 varieties) \$15/packet

- ◆ **-Sugar Maple:** A favorite shade tree with reliable fall color. Valued for its hard dense, fine-grained and difficult-to-split wood. Trees in open grows to 80 feet tall and 40 feet wide. Requires a fertile, well drained soil and ample moisture. Full sun or partial shade. Performs poorly in compacted soil with limited root space.
- ◆ **-Tulip Poplar:** Oval to round crown. Beautiful yellow, tulip-like flowers attract honey bees. Bright green foliage turns yellow in fall. Needs full sun and plenty of space. Grows 70-90 feet with a spread of 35-50 feet. Good to use to fill in vacant spots in tree plantings.
- ◆ **-White Oak:** A large (90 feet) majestic native tree with wide spreading branches and leaves of blue-green which turn wine colored in the fall. Tolerates most soils except those very wet. It has a slow to medium growth rate. An extremely valuable timber tree and provides acorns for wildlife.

Red Oak Packet (15 seedlings) \$15/packet

This wide, massive, long-lived shade tree is fast growing reaching 80 to 90 feet at maturity. Its lustrous green leaves change to russet red in the fall. It is commercially valuable timber and provides acorns for wildlife.

Wildflower Seeds \$5/packet

The wildflower seed mix is a blend of 20 different annual and perennial species that will produce an extravagant array of color in wet or dry environments. The wildflower mix easily germinates and adapts to a wide variety of climatic and soil conditions. Once the wildflowers are established, relatively little maintenance is required. The wildflowers display their beauty with a multitude of colors from early spring into fall. Each one ounce wildflower seed packet contains enough seed to plant approximately 250 square feet.

Bird and Butterfly Mixture \$5/packet

The seed mixture is a blend of 20 different annual and perennial species designed to attract both birds and butterflies. Each one ounce bird and butterfly seed packet contains enough seed to plant approximately 250 square feet.

Hummingbird Mix \$5/packet

The seed mixture is a blend of 11 different annual and perennial species formulated for Hummingbird forage. One-half ounce for \$5.00.

Plantskydd Soluble Powder Deer Repellent \$20/Box—Proven effective in commercial applications, this 100% natural product is now available to the home gardener and landscape professional. Animals avoid treated ornamentals, shrubs, perennials and annuals. The plantskydd can last up to six months over winter on dormant ornamental shrubs and 3 months on most other succulent / broadleaf plants. The smell of the blood meal base powder deters the deer and wildlife. For more information visit www.plantskydd.com \$20.00 per 1 lb box
